RE: CGA Written Testimony  
H.B. No. 6816 & 6667, 2023. Session Year

An Acts Concerning an Individual's Right to Own and possess firearms and related components without restrictions and bureaucratic infringements. The passage of this bill for mandatory micro stamping, elimination of .22 caliber ammunitions and firearms along with the 1 gun a month club nonsense. It is a useless and ineffective attempt to control the criminals from using ammunition and firearms in a criminal act that we all know they do not follow any such laws that stop them from getting firearms and are not the ones who will abide to any lawful order or act which only burdens the law abiding citizens and leave the citizens open to being victimized by criminals.

I am in against the passage of HB 6816 and HB 6667 as it is just another effort by certain organizations and legislators to violate the Citizens Rights as clearly stated in the Second Amendment and the latest Supreme Court rulings. Every law abiding American Citizens has the right to unfettered possession of firearms and their related components as a means to self defence in the home and on the land they walk.

Sincerely, Damian Fries
